

DEVANG KUMAWAT

AI Agent Engineer · Product & Design · GTM & Content

devangk1403@gmail.com · Bengaluru, India (Open to Relocation) · [LinkedIn](#) · [GitHub](#) · [YouTube](#)

2026 Graduate CS Engineer and agentic-AI builder who ships across the entire surface of an early-stage company. I design and build AI agents, redesign products and landing pages, run go-to-market experiments, and create content that has reached 200K+ views. I work directly with founders, move fast, and measure myself by what ships and what it moves.

EXPERIENCE

CrewM8.ai (Useful Ventures) | Agentic AI & Product Intern

April 2026 – Present · Remote

- **Owned the user-feedback loop end to end**, ran weekly interviews with trial members and translated what they said into concrete roadmap priorities and then executed them in real code also using Claude Code and Codex.
- **Reframed and redesigned the product dashboard and marketing landing page end-to-end** (information architecture, PRD, design system) based on user research and interviews, and developed the brand voice and market positioning using April Dunford's framework.
- **Ran a market-validation experiments** for the UK and Canada SMB segment and China Enterprise Distributors. **Secured multiple 30-day enterprise trials** with feedback, then turned the stalled sales motion into a prioritized product roadmap.
- **Wrote and shipped LinkedIn content as the founder's ghostwriter**, developing their brand voice and using it to put the company in front of the right audience.

Brixline | Founder's Office - Product & Marketing Intern

Dec 2025 – Mar 2026 · Bengaluru

- **Built an AI lead-scoring agent wired into the CRM** that auto-researched inbound leads against the ICP, ranked them, and enriched records, cutting the sales team's lead-qualification time by **~60%**.
- **Supported the sales motion** behind multiple high-value deals by surfacing best-fit leads and equipping the team with follow-up context.
- **Owned marketing and design end-to-end** for a real-estate project: finalized the campaign and designed every physical and digital customer touchpoint to keep the brand consistent.

PROJECTS

AstroAgent - LangChain agent + evaluation harness, built in one week [\[GitHub\]](#)

- **Engineered a production-style agent with a full tool set and layered guardrails** (crisis, injection, medical, legal, financial), plus a 30-case golden eval set, an LLM judge, a two-model comparison, and a 46-case adversarial suite (prompt injection, encoding, Hindi/Hinglish).
- **Achieved 93% golden-set pass** and a **0% attack-success rate** at the output layer.

KusPus - local-first Windows speech-to-text app [\[GitHub\]](#)

- **Created an open-source, privacy-first Windows dictation app** on whisper models for fully on-device transcription.
- **Started as a personal tool and grew into a feedback loop** as friends adopted it and drove each round of improvements.
- Built on whisper.cpp for low-latency, fully on-device transcription and shipped as a portfolio product.

Content - personal YouTube channel [\[YouTube\]](#)

- **Grew the channel to 200K+ views** creating pop-culture content, self-taught across scripting, editing, and audience growth.

SKILLS

AI Agents & Tools: LangChain / LangGraph, agent evaluation & guardrails, RAG, Qdrant, vLLM, prompt engineering, Claude Code, Codex, Cursor, ChatGPT, Perplexity, Notion, Office Suite

Engineering: React, TypeScript, Next.js, Node.js, Python, Docker, Fly.io

Product & Design: Product design, dashboards, design systems, User research (NN/g), User experience, PRDs, information architecture, Power BI, SQL, Data Analysis

GTM & Content: Positioning, Brand voice, Sales/ Pitch decks, Video and written content

EDUCATION

B.E. Information Science & Engineering, BMS Institute of Technology and Management, Bengaluru 2022-2026
CGPA 8.3
